

## Class Task: Create a Simple Personal Webpage

### Instructions:

Using the HTML concepts we learned today, create a simple personal webpage with the following requirements:

#### 1. Basic Structure:

- Use `<!DOCTYPE html>` at the top.
- Create `<html>`, `<head>`, and `<body>` sections properly.
- Add a `<title>` for the webpage in the `<head>` section.

#### 2. Heading and Paragraph:

- Add a main heading with your name (e.g., "Welcome to My Webpage").
- Write a short paragraph introducing yourself.

#### 3. Links:

- Add a link to your favorite website (e.g., YouTube, Wikipedia).

#### 4. Image:

- Add any image you like (e.g., your favorite hobby, animal, or cartoon).

#### 5. Button:

- Add a button with text like "Click Me!" (It doesn't have to do anything for now).

#### 6. List:

- Create a list of your three favorite foods or hobbies.
- Use either an **ordered list** (`<ol>`) or an **unordered list** (`<ul>`).
