

## HTML Assignment: Registration Form

### Objective:

Create a **registration form** using HTML form elements you learned today. This task will help you practice text fields, password fields, checkboxes, radio buttons, select menus, textareas, file uploads, and form actions.

---

### Instructions:

1. Create a new HTML file and name it `registration_form.html`.
2. Inside the file, create a form with the following fields:
  - **Full Name** → Text input
  - **Email** → Text input
  - **Password** → Password input
  - **Gender** → Radio buttons (Male, Female)
  - **Hobbies** → Checkboxes (Reading, Sports, Music)
  - **Country** → Dropdown menu with at least 3 countries
  - **Profile Picture** → File upload input
  - **About You** → Textarea for description
3. Add two buttons at the end:
  - **Submit** button
  - **Reset** button
4. Use the **POST** method for the form.
5. Use the `action="#"` attribute for now since we are not connecting to a backend yet.
